- Panel mounting segment (2)
- Spacer (3)
- Stud (3)
- Screw (3)

Tool List

- Screwdriver

Warning

⚠ Before servicing any installed gauge, you must:

- Depressurize system

Panel Mounting Instructions

1. Cut a 5 11/16 in. (144 mm) diameter hole in panel.
2. Insert panel mounting flange into panel.
3. Place both panel mounting segments over the three studs.
4. Thread the spacers onto the studs and tighten.
5. Assemble gauge case to studs.
6. Put screws through the gauge case holes and thread into studs.
7. Tighten screws until gauge feels secure in panel.
