

SWAGELOK® FLUID HANDLING COMPONENTS AND SYSTEMS

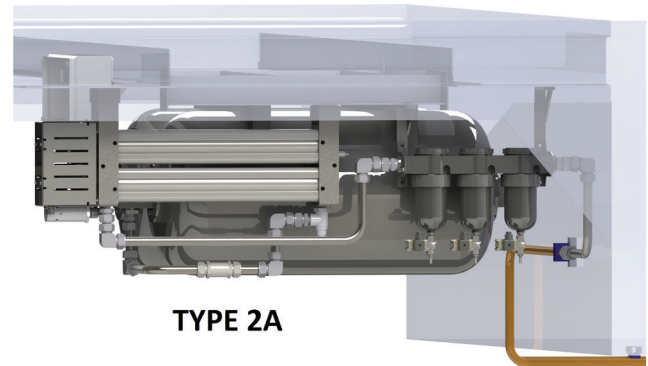

ENGINEERED TO RELIEVE PRESSURE
AND GET YOU ROLLING

With Worldwide Experience Through the Global Swagelok Network, **Swagelok Albany | Connecticut** Offers Proven Solutions for Fluid Handling Components and Systems for the Rail industry

An important key to reliable rolling stock is an effective air system. That's why Swagelok's Rail Industry Solutions are built to minimize leakage and increase reliability and performance. We optimize assembly to improve ease of maintenance and reduce engineering time.

Swagelok's Rail Solutions are manufactured from sturdy, corrosion-resistant high quality 316SS to provide leak-tight performance. Our sub-assemblies are built, tested and delivered right from our local inventory.

TYPE 2A

LOCAL SUPPORT

Swagelok couples its world class engineering with local support – field engineering, inventory, consignment, and custom solutions, to ensure that layouts are best practice and components are long life.

We will also work with you to streamline your procurement process by building specialized kits to make ordering easy, precise and fast.

Swagelok Rail Solutions provide the lowest cost of manufacture and ongoing maintenance, backed by the Swagelok Limited Lifetime Warranty.

WE'RE LEAK TIGHT AND WE BACK IT UP
