

# Swagelok® Design and Build Services

Engineered to Perform Under Pressure

## Swagelok® Design and Build Services

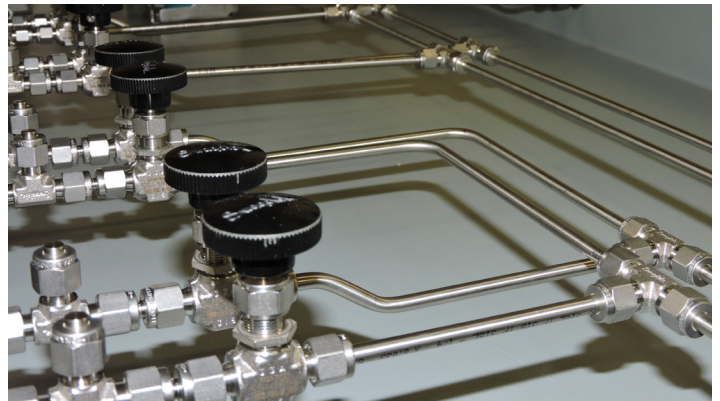

We are committed to helping you tackle your toughest business challenges. You trust our components; now trust us to build a fluid system assembly configured to meet your specific requirements.

Whether you have a preliminary drawing or a simple idea, it's never too early to consult with our experts. From gas delivery assemblies to control panels and everything in between, we'll work with you to bring your assembly idea to life. Then we'll build it and deliver a complete fluid system assembly backed by Swagelok's Limited Lifetime Warranty.

We follow the Swagelok Quality System (SQS) to ensure excellence. Our technicians adhere to strict Swagelok methods and guidelines for tube and pipe fitting assembly, tube bending, and orbital welding, plus our weld specialists are ASME qualified.

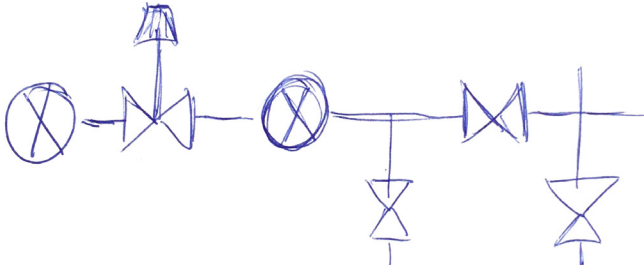

### Choose Swagelok Design and Build to receive:

- Unparalleled quality
- Reliability and consistency you can count on
- Fast, effective, and efficient service
- Technical product and application expertise
- Limited lifetime warranty

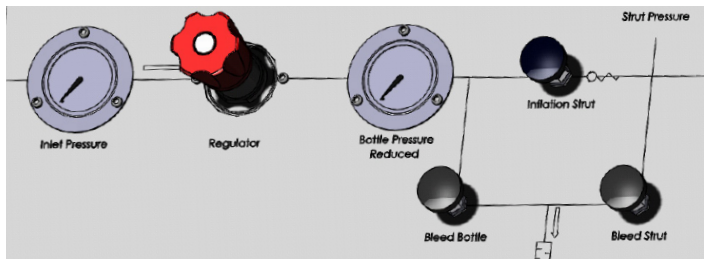

## Our Design and Build Process:

### 1. Your Idea

Submit a drawing with assembly specifications, or call us with your concept and we'll take it from there. We ensure that all of your questions are answered before our drawings and technical quotations are produced.

### 2. Design

We provide a CAD drawing of your assembly, a technical quotation, firm pricing, and delivery information.

### 3. Assembly

Next, we gather the necessary parts. Assembly takes place in a clean and well-equipped assembly area or clean room environment per your application.

### 4. Your Solution

We manage the inspection, packaging, and delivery. All custom assemblies are delivered with supporting documentation and our limited lifetime warranty.

Swagelok Alabama | Central & South Florida | West Tennessee

## Solutions Engineered to Benefit You

**At Swagelok, we take pride in the quality of our work, the brilliance of our people, and the ingenuity of our solutions.**

**Unique assembly services that make it easy to acquire quality pre-built fluid system assemblies backed by a limited lifetime warranty.**

With each custom build comes peace of mind, knowing that you and your business are in the hands of fluid system experts. No matter how intricate the project, we perform under pressure to meet the high standards for which we're known.

Swagelok Design and Build Services deliver assemblies that consist entirely of Swagelok components but can also incorporate third-party components as specified. We'll gather the parts, then perform any welding, wiring, and tube bending that your assembly requires through completion.
