

At Swagelok Indonesia, we are committed to providing our customers with customized training services that align with their specific needs and concerns.

Our hands-on training products range from safety-focused programs such as tube fitting safety installation to technical offerings like tube bending and valve selection. The training sessions are led by experienced Swagelok experts in each respective field.

Participants leave our Swagelok training courses with a solid understanding of processes that can enhance workplace safety and improve efficiency and productivity.

### TRAINING SERVICES

Swagelok

## Swagelok® Training Courses

We, at Swagelok, consider safety to be our top priority. Our customers depend on our fluid system products to control and operate your equipment safely and securely - just as we depend on our associates to adhere to the highest safety standards. Swagelok Indonesia is uniquely qualified to provide outstanding training on proper product application and installation.

We have several different topics that make up our Swagelok® Training offerings:

- Tube Fitting Installation Essentials
- Tube Fitting Inspection Essentials
- Tube Bending Essentials
- Hose Essentials
- Process Analyzer Sample Systems

Customer benefits include:

- Fluency with the proper application and installation of critical fluid system components
- Optimizing your system layout and performance
- Familiarity with the potential hazards associated with fluid systems
- Reduced downtime caused by unnecessary maintenance

## Tube Fitting Installation

Our customers trust us to provide expert hands-on training on the proper application and installation of our tube fittings.

Customer benefits include:

- Improved employee skills
- Reduced installation and rework costs
- Reduced needless downtime
- Increased employee safety in the plant

## Tube Fitting Inspection

How do you check your systems prior to commissioning or testing? We can help you troubleshoot and identify issues pre-start up or as part of your ongoing maintenance programs.

Customer benefits include:

- Noticing potential hazards
- Scoping out maintenance work
- Identifying areas of concern
- Avoid unnecessary and costly leaks

## Tube Bending

Proper tubing bending is a skill that needs to be taught.

This course provides techniques through hands-on exercises for every situation.

Customer benefits include:

- Perform 90 and 180 bends with ease
- Route complex bends in your system
- Minimize wastage due to re-work
- Bending do and don s

## Hoses

Swagelok provides comprehensive training on all aspects of hose products from selecting and specifying to installation and inspection.

## Process Analyser Sample Systems

Let our experienced and industry recognized instructors guide you through the design and operation of different analytical systems.
