

60 Series Ball Valves

Engineered for reliability and low maintenance

Swagelok

Swagelok London

Options and Accessories Available

Valve Handle Options

Lever handles are standard. Also available are:

Oval Handles

Locking Brackets

Oval Latch-Lock
Handles

An extended handle option is available for insulated service.

Low Dead Space Inserts

- Reduce fluid entrapment around the ball, stem, and seats while the valve is open or closed
- Made from carbon/glass reinforced PTFE
- Not for use on steam, thermal, or fire series valves

Vented Valves

External Vent Option

Internal Vent Option

2-way ball valves are available with either an internal or an external vent. These vents are available for either upstream or downstream service.

Panel Mount Kit

- Vertical or horizontal mounting
- Can be installed on panels up to 3/16 in. for 62 series and 1/4 in. thick for 63, 65, 67, and 68 series
- Fit oval and lever handle

Pneumatic, ISO-5211 Compliant and Electric Actuator Options

Pneumatic Actuators

Swagelok rack and pinion pneumatic actuators are designed to actuate Swagelok® ball valves. The actuators are compact, lightweight, easily mountable and can be operated with standard shop air. They are available in spring-return and double-acting modes.

For more information, see *Swagelok Ball Valve Actuation Options catalog, MS-02-343*.

ISO-5211 Compliant Pneumatic Actuators

The Swagelok rack and pinion pneumatic actuators are ISO-5211 compliant and are suitable for general applications. They are available in spring-return and double-acting modes.

For more information, see *Swagelok Ball Valve Actuation Options catalog, MS-02-343*.

Electric Actuators

Swagelok electric actuators are rugged and lightweight. They connect alternating- or direct-current power sources.

For more information, see *Swagelok Electric Actuators - 141 and 142 Series catalog, MS-01-35*.

Important Information:

- Swagelok ball valves are designed to be operated in a fully open or fully closed position.
- Packing adjustment may be required during the valve's service life.
- Caution: Actuated assemblies must be properly aligned and supported. Inadequate alignment or improper support of the actuated assembly may result in leakage or premature valve failure.

For more information on Swagelok 60 Series Ball Valves see *Ball Valves, General Purpose and Special Application, 60 Series catalog (MS-01-146)*.

Suitable for a Wide Range of Applications

With a unique coned-disc, spring-loaded seat; live-loaded, two-piece chevron stem packing; and three-piece, swing-out design, 3-piece process/instrumentation, Swagelok® 60 series ball valves are designed for reliability and low maintenance. This quarter-turn ball valve is available in 2- and 3-way configurations as well as a variety of materials including stainless steel, carbon steel, brass and special alloys.

Specifications

- Variety of end connections in 1/8 to 2 in. and 6 to 25 mm sizes
- Temperature ratings from -65 to 850°F (-53 to 454°C)
- Standard working pressure up to 2200 psig (151 bar) with an option to increase to 3000 psig (206 bar)
- Wide selection of seat materials including:
 - Reinforced PTFE
 - Alloy X-750
 - Carbon/glass PTFE
 - PEEK
 - UHMWPE
 - Virgin PTFE
- Optional vent porting
- SC-11 cleaning available

Features of the 60 Series General Purpose and Special Application Ball Valves

End Connection Options

Swagelok Tube Fitting

Female Pipe Thread

Tube and Pipe Socket Weld

Pipe Butt Weld

Tube Extension

Sanitary Fitting

VCR Metal Gasket Face Seal Fitting

VCO O-Ring Face Seal Fitting

Female Pipe Thread to Swagelok Tube Fitting

Special Application 60 Series Valves

Steam Trap Test Valve

Consists of two 63 series ball valves and a universal mount. Steam trap is not included.

Steam Service (S60P)

-20 to 600°F (-28 to 315°C)

PEEK seats and stem seals designed to resist absorption of water and erosive damage of steam.

Thermal Service (T60M)

-65 to 850°F (-53 to 454°C)

Unique, spring-like metal seats provide positive leak-tight sealing at temperatures up to 850° F. Works well in low-and high-pressure systems.

Fire Series (A60T)

-40 to 400°F (-40 to 204°C)

Flexible graphite stem packing provides a reliable stem seal during normal conditions and maintains a seal in the event of a fire.

All-Welded (W60T)

-20 to 450°F (-28 to 232°C)

Full penetration weld provides one-piece body construction for leak-tight fluid containment.

Rapid Cycle (R60T)

0 to 100°F (-17 to 37°C)

Features an O-ring stem seal, which may be more effective, where rapid cycling is required or when packing adjustments may be difficult.

Chlorine Series (C60V)

-20 to 250°F (-28 to 121°C)

Carbon steel valve body with virgin PTFE seats and packing, in accordance with the guidelines of the Chlorine Institute Pamphlet 6.

Low Temperature (L60)

-65 to 250°F (-53 to 121°C)

Available with a variety of seat materials. Configurations include: 2-way and 3-way in stainless steel and 2-way in brass.
