

Swagelok®

High Pressure Valve IPT

Swagelok High Pressure Valve

Injecting high pressure product into your milk dryers?

Having reliability and maintenance issues with your valves?

Swagelok has brought its reputation for providing the highest manufacturing standards, machining, and material quality to the dried milk powder industry by introducing the **Swagelok High Pressure Dryer Valve**.

This product is backed by technical support personnel who can train staff, provide solutions using industry best practice to reduce down time and increase efficiency.

Customer training

Improved customer training will help to reduce system downtime. Best practice tube fitting installation, including cone and thread medium and high pressure tube systems.

Manufactured in the USA

Using the highest quality manufacturing systems.

Proprietary materials

Including Swagelok PREN 24.6 high alloy to improve corrosion resistance.

Interchange with other brands

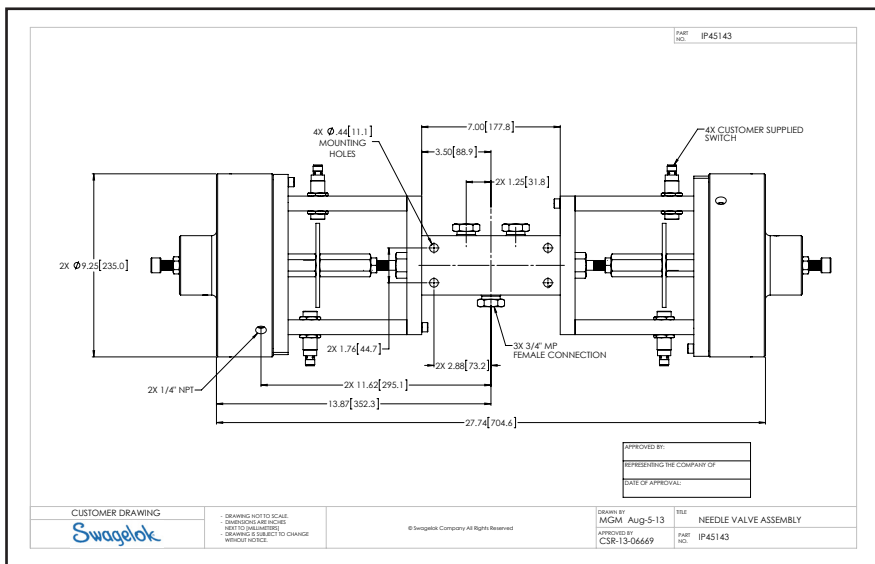

Swagelok IPT series medium- and high-pressure cone and thread fittings may be interchanged with cone and thread fittings and tube end assemblies from other manufacturers who follow the same design standard.

Limited Lifetime Warranty

Providing assurance that the product is manufactured to the highest standards using the best quality systems and materials.

Spare parts readily available

Reducing down time, increasing efficiency.
