

**Our Key Components
(AND MORE)
for your Fluid-System
Optimization**

Swagelok premium-quality, leak-tight products deliver the renowned reliability, easy installation, and ultra-long service life to keep you, your processes, and your equipment operating safely, efficiently, and cost-effectively – especially in your most challenging applications:

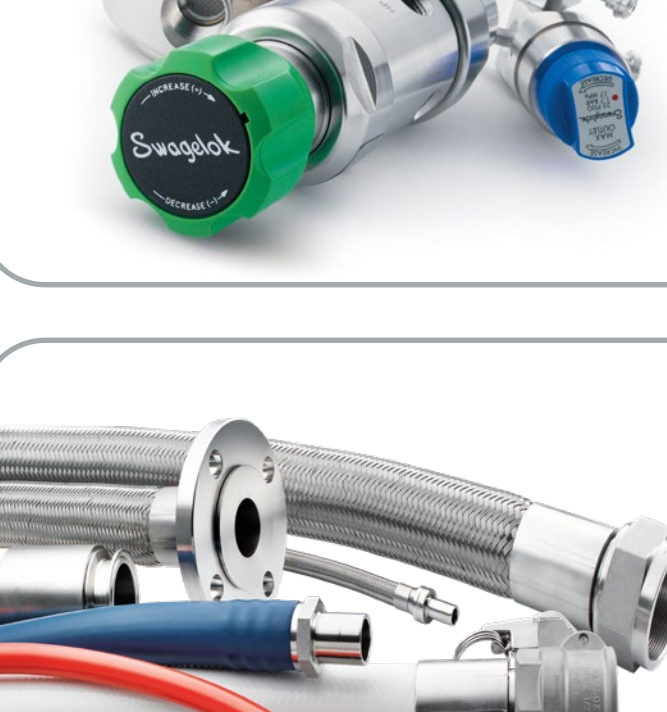

Fittings

Since 1947, the global industry standard for unparalleled connection safety and performance. Our design, manufacturing excellence, and use of superior raw materials makes our brand THE brand for consistent exceptional results, time after time after time.

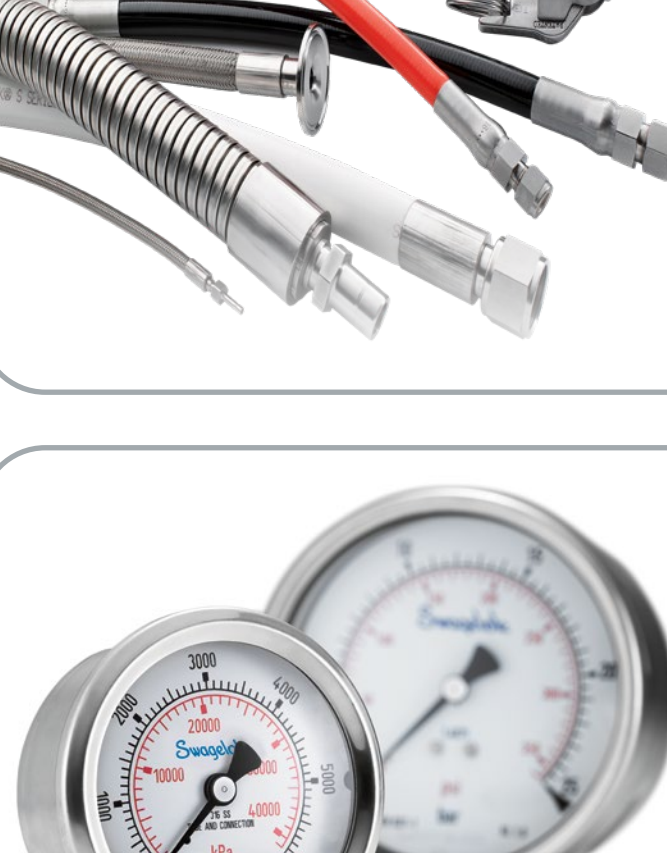

Valves

Our process and instrumentation styles yield optimum productivity and profitability in even the most demanding jobs...in numerous sizes and materials, for a broad range of temperatures and working pressures. A wide variety of end connections available.

Pressure Regulators

Whether you choose our back-pressure, pressure-reducing, changeover, dome-loaded, or other types, you can be assured you'll realize accurate and expected pressure levels across a vast array of applications.

Hoses and Flexible Tubing

Offered in several core materials, pressure ratings, and degrees of flexibility – with multiple end connections, tags, and protective covers, we're your ideal component for flexible connections between stationary and moving equipment, connections that are temporary or involve frequent disconnects, or to isolate from high-vibration machinery.

Measurement Devices

Swagelok gauges, flow sensors, thermometers/thermowells, flowmeters, and transducers provide you accurate, on-demand pressure, temperature, and flow readings.

Assemblies

Grab Sampling Panels, Mechanical Seal Support Kits and Panels, Gas Distribution Panels, plus sub-assemblies to large, complex skids and enclosures, call us for expert, warranted, LOCAL design and build support to enable you to get more out the door safely and faster.

In addition, our value-added suite of Strategic Support Services supplements our premium product lines:

Training

Learn how to safely and properly pull up a tube fitting and bend tubing of various materials and diameters. Understand how to choose, size, route, and maintain industrial hoses, per application. Do the same for valves in your fluid system. We even have an advanced tube bending course to show you how to make highly challenging offset, rolling offset, parallel, and segmented bends!

Evaluations

Know how much money you're losing due to leaking connections and/or poor hose practices? Let us visit to carefully and closely audit your current systems. We'll not only help identify your problem areas, but will provide you proven and trusted recommendations on how to safely, quickly, and significantly improve your overall operations for a healthier Bottom Line.

Rentals

Why buy new when you can lease genuine Swagelok Multi-Head Swaging Units, Orbital Welder Packages, and Benchtop Benders from us for your infrequent of short-term projects? All our rental tools are pristinely maintained and come with all the accessories you'll need to get your jobs done on-time, on-budget, and as-planned.

Rely on us.
