

# Universal Mount

## Installation and Strainer Element and Gasket Replacement Instructions

## Installation

1. Install the universal mount in its delivered, fully assembled condition with the **strainer cap** facing *down*.
2. When attaching a steam trap to the universal mount, follow the steam trap manufacturer's recommendations for proper bolt torque.

## Replacing the Strainer Element and Gasket

Before servicing any installed universal mount, you must depressurize the system.

1. Unthread the **strainer cap** and remove.
2. Remove the **strainer gasket** and discard.
3. Remove the **strainer element** and clear any debris from element, or replace with a new element.
4. Apply a system-compatible lubricant to all surfaces of a new **strainer gasket**.
5. Install the **strainer element**, the **new strainer gasket**, and the **strainer cap** in the order shown.
6. Tighten the **strainer cap** to the body with 500 in.·lb (60 N·m, 575 cm·kg) of torque.
